SKY & TELESCOPE™ Index to Volume 85

January–June 1993

Titles

Blackbird Reborn, The, *Samantha Parker*, 6:16
Comets at the Solar System's Edge, *Paul R. Weissman*, 1:26
Comet Swift-Tuttle: Does It Threaten Earth? *Brian G. Marsden*, 1:16
Deciphering the Mysteries of Stellar Origins, *Charles Lada*, 5:18
Disk-Jet Connection, The, *Roger Blandford* and *Arieh Königl*, 3:40
Exotic Worlds, *William Sheehan* and *Stephen James O'Meara*, 1:20
Galaxies Far Away and Long Ago, *Alan Dressler*, 4:22
Galaxy Redshifts Reconsidered, *Sten Odenwald* and *Richard Tresch Fienberg*, 2:31
Gemini Project, The: Twins in Trouble? *Leif J. Robinson* and *Jack Murray*, 5:26
Getting the Measure of Gravity, *George T. Gillies* and *Alvin J. Sanders*, 4:28
How Galileo Changed the Rules of Science, *Owen Gingerich*, 3:32
If Galileo Had Owned a CCD, *Jeffrey Baumgardner* and *Michael Mendillo*, 6:19
Jan Oort Remembered, *Govert Schilling*, 4:44
Japan's Leap Toward Space, *Roger H. Ressmeyer*, 4:34
Long Road to Jupiter, The, *J. Kelly Beatty*, 4:18
Mount Wilson: America's Observatory, *Robert Jastrow* and *Sallie Baliunas*, 3:18
Mount Wilson Photo Album, A, *Dennis diCicco*, 3:25
New York's Cosmic Car Conker, *Dennis diCicco*, 2:26
Sky-Gazer's Almanac 1993, *Roger W. Sinnott* and *Alan M. MacRobert*, 1:57
Supernova 1987A Revisited, *Robert Naeye*, 2:39
Temples in the Sky Part I — The Far South, *Serge Brunier*, 2:18
Temples in the Sky Part II — The Old Continent, *Serge Brunier*, 6:26
Universe in Color, The, *Dennis diCicco*, 5:34

Authors

Adzema, Robert, letter, 4:6
A. M., see *MacRobert, Alan*
Anderson, Jay, see *Espenak, Fred*
Arp, Halton, letter, 2:6
Baldock, Chris, letter, 5:6
Baliunas, Sallie, see *Jastrow, Robert*
Baumgardner, Jeffrey, and *Michael Mendillo*, If Galileo Had Owned a CCD, 6:19
Beatty, J. Kelly, Hale's Forgotten Observatory, 3:23
Long Road to Jupiter, The, 4:18
Beish, Jeff D., letter, 4:6
see also *Parker, Donald C.*
Betlem, Hans, The Day That Rained Stones, 6:96
Bird, Loren R., Starthenon: A Temple to the Stars, 1:95
Blandford, Roger, and *Arieh Königl*, The Disk-Jet Connection, 3:40
Bortle, John E., book review, 5:57
What 1993 Holds in Store for Comet Watchers, 1:116
Brown, William A., letter, 3:7
Brunier, Serge, Temples in the Sky: Part I — The Far South, 2:18
Temples in the Sky: Part II — The Old Continent, 6:26
Byrd, Deborah, book review, 3:59
Clark, Roger N., A Visual Tour of M101, 6:102
Clarke, Arthur C., letter, 1:7
Cragg, Richard E., letter, 3:6
Davies, Paul, What Hath COBE Wrought? 1:4
D. diC., see *diCicco, Dennis*
deVaucouleurs, Gérard, George W. Ritchey and the Dina Laboratory, 1:98
diCicco, Dennis, Meade's 8- and 10-inch Starfinder Telescopes, 1:40
Mount Wilson Photo Album, A, 3:25
New York's Cosmic Car Conker, 2:26
1992 Perseids, The: An Indication of Things To Come? 2:108
Two New Approaches to Off-Axis Guiding, 2:45
Universe in Color, The, 5:34
Dressler, Alan, Galaxies Far Away and Long Ago, 4:22
Drummond, Jack, letter, 1:7
DuHamel, Robert, letter, 2:6
Dunham, David W., Asteroid Occultations for 1993, 2:76
Lunar Occultation Highlights for 1993, 1:74
Engelhorn, Craig, Birth of an Off-Axis Newtonian, 3:87
Mounting an Off-Axis Newtonian, 4:93
Espenak, Fred, and *Jay Anderson*, letter, 1:6
Fienberg, Richard Tresch, see *Odenwald, Sten*
Fraknoi, Andrew, letter, 4:6
Gavin, Maurice, How CCD Imaging Is Reviving Urban Astronomy, 1:110
George, Alvin D., A Colossal Refractor, 3:103
Gillies, George T., and *Alvin J. Sanders*, Getting the Measure of Gravity, 4:28
Gingerich, Owen, How Galileo Changed the Rules of Science, 3:32
Goldman, Stuart J., book review, 4:60
Not-So-True Views from Space, 6:53
Gordon, Rodger W., letter, 3:6
Haas, Sissy, letter, 5:6
Phooey on the Midsize Reflector, 4:4
Hagerman, Mark, see *Stevens, Larry A.*
Harrington, Philip, Binocular Star-Hop in Orion, A, 1:48
Star-Hop in the Dipper's Bowl, A, 6:43
Hérard, Marcel, A Purely Solar Telescope, 6:89
Hess, Fred C., book review, 5:52
Hill, Richard, book review, 6:53
Hoecker, Donald A., letter, 3:6
Horne, Johnny, Celestron CG-11, The, 5:43
Jack Newton Cold Camera, The, 3:62
Houston, Walter Scott, Deep-Sky Wonders, 1:114, 2:110, 4:110, 5:108, 6:106
Huestis, David A., book review, 2:52
Hunter, Tim, and *James McGaha*, Grasslands Observatory, 5:98
Isles, John, Watch an Evolving Binary Star, 6:72
Jastrow, Robert, and *Sallie Baliunas*, Mount Wilson: America's Observatory, 3:18
Jedicke, Peter, Canada's Unique Brand of Amateur Astronomy, 5:4
Königl, Arieh, see *Blandford, Roger*
Kramer, Jack, The Observer's Dictionary, 6:4
Kundrat, John, letter, 6:6
Kutner, Marc L., see *Mead, Kathryn N.*
Lada, Charles, Deciphering the Mysteries of Stellar Origins, 5:18
Leasure, Jim, see *Stevens, Larry A.*
Levy, David H., Star Trails, 1:108, 2:98, 3:105, 4:102, 5:101, 6:98
Likert, Gary, letter, 5:7
Livitski, Rich, How I Built a 20-inch Binocular, 2:89
Lovi, George, Rambling Through the Skies, 1:63, 2:63, 3:67, 4:63, 5:63, 6:63
McDowell, Jonathan, Mission Update, 6:14
McGaha, James, see *Hunter, Tim*
MacRobert, Alan, Action in the Orion Nebula, 2:70
Daylight Occultation of Venus, A, 4:75
In Search of a Good Binocular Mount, 6:35
Juno Swings by Betelgeuse, 2:78
Keeping Warm Under Winter Stars, 2:28
Partial Solar Eclipse on May 21st, A, 5:70
Searching Out the Nearest Stars, 4:70
Star-Hop in Gemini, A, 3:47
Tiny Visitor Departs, A, 1:76

Departments and Features

Amateur Astronomers —
Astrophotographer's Dream Home, An, *4:99*
Calendar of Events, *3:106, 5:103, 6:100*
Colossal Refractor, A, *3:103*
Day That Rained Stones, The, 6:96
Grasslands Observatory, *5:98*
Martian Dust-Storm Watch, A, *1:104*
Novaya Zemlya: A Solar Mirage, 2:96
Seeing Canals on Mars, 2:100
Star Trails, *1:108, 2:98, 3:105, 4:102, 5:101, 6:98*
Astronomical Computing —
Asteroids for 1993, *4:85*
Calculating Asteroid Diameters, 6:83
Evening of CCD Photometry, An, 5:83
Limiting Magnitude of a CCD Camera, The, *2:84*
New CD-ROMs About the Solar System, *3:94*
Own the Outer Planets on CD-ROM, *4:84*
Star's Visibility Just Before Occultation, A, *1:89*
Backyard Astronomy —
Binocular Star-Hop in Orion, A, *1:48*
Keeping Warm Under Winter Stars, 2:28
M Is for Messier, *4:38*
Star-Hop in Gemini, A, *3:47*
Star-Hop in the Dipper's Bowl, A, 6:43
Books & Beyond —
Art of Robert McCall, The: A Celebration of Our Future in Space, Robert McCall, *3:58*
Aurora Watcher's Handbook, The, Neil Davis, 2:52
Briefly Noted, *1:83, 2:55, 3:59, 4:60, 5:58, 6:58*
Cambridge Guide to Astronomical Discovery, The, William Liller, *5:57*
Children's books, *1:80*
Dictionary of Minor Planet Names, Lutz D. Schmadel, *4:60*
Epoch 2000, Farpoint Research, *3:56*
Expert Astronomer, Expert Software, Inc., 2:54
Explanatory Supplement to the Astronomical Almanac, P. Kenneth Seidelmann, editor, *3:58*
Field Guide to the Stars and Planets, A, Jay M. Pasachoff and Donald H. Menzel, 5:52
Guide to the Sun, Kenneth J. H. Phillips, 6:53
Looking at Earth, Priscilla Strain and Frederick Engle, 6:52
Masters of Time: Cosmology at the End of Innocence, John Boslough, 2:55
Megastar, E.L.B. Software, *5:53*
Murmurs of Earth: The Voyager Interstellar Record (CD-ROM), Warner New Media, *4:60*
PC-Sky, CapellaSoft, 6:57
Planetary Event and Eclipse Predictor, CEB Metasystems, Inc., *4:59*
Project Star: The Universe in Your Hands, Harold P. Coyle and others, *3:57*
Software Update, *3:59*
StarList 2000, Richard Dibon-Smith, *5:58*
Walking Tour of the Night Sky, David Tarnow, *3:59*
Worlds in the Sky, William Sheehan, *4:57*
Celestial Calendar —
Action in the Orion Nebula, 2:70
Asteroid Occultations for 1993, 2:76
Calendar Notes, *1:78, 2:77, 3:81, 4:78, 5:79, 6:75*
Comet Schaumasse Dogs the Earth, *3:80*
Daylight Occultation of Venus, A, *4:75*
Exploring the Triesnecker Rilles, *3:74*
February's Trapezium Eclipse, 2:72
Jovian Belt Fades Again, *4:76*
Juno Swings by Betelgeuse, 2:78
Jupiter's Satellites, *1:79, 2:75, 3:79, 4:77, 5:78, 6:78*
Kassandra at M17, 5:76
Lunar Occultation Highlights for 1993, *1:74*
Markarian 421: The Most Variable AGN, 5:75
Partial Solar Eclipse on May 21st, A, 5:70
Planet Preview for 1993, A, *1:70*
T Pyxidis: Still Waiting . . . *3:76*
Searching Out the Nearest Stars, *4:70*
Tiny Visitor Departs, A, *1:76*
Watch an Evolving Binary Star, 6:72
Westerner's Lunar Eclipse, A, 6:70
Evening Sky, The, *1:64, 2:64, 3:68, 4:64, 5:64, 6:64*
50 & 25 Years Ago, *1:7, 2:7, 3:7, 4:7, 5:7, 6:6*
Focal Point —
Canada's Unique Brand of Amateur Astronomy, *5:4*
Observer's Dictionary, The, *6:4*
Phooey on the Midsize Reflector, *4:4*
Righting Galileo's "Wrong," *3:4*
We Stargazers, *2:4*
What Hath COBE Wrought? *1:4*
Images, *1:32, 3:38, 6:22*
Letters, *1:6, 2:6, 3:6, 4:6, 5:6, 6:6*
New Product Showcase, *1:36, 2:48, 3:52, 4:48, 5:48, 6:48*

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive and does not supplant the other parts of the index. For example, material in such regular features as Books & Beyond is ordinarily indexed only under the Departments and Features section.

Amateur activities: Astronomy To Go, *5:101*; Canadian organization of, *5:4*; CCD photometry, *5:83*; convention in Canada, *1:108*; double-star observing, *3:112*; dressing for cold-weather observing, *2:28*; Hidden Hollow conference, *3:105*; high cost of conventions, *4:6*; meteorite hunting after fall in Uganda, *6:96*; meteor observing, *1:7; 2:6*; new observer's "dictionary," *6:4*; new publication *Amateur Skywatch*, *2:6*; in Philippines, *5:6*; planetary observing with large telescopes and excellent seeing, *1:20*; Project ASTRO, *4:6*; projects for Hubble Space Telescope, *1:12; 2:14*; sightings of Twin Quasar, *3:119*; and Soviet Astronomical Society, *1:7*; Starfest 1992, *1:108*; for teaching youth, *4:6*; watching for dust storms on Mars, *1:104*

Art: Comet Swift-Tuttle by Don Davis, *1:16*; Galileo's papal inquisition by Joseph Nicolas Robert-Fleury, *3:32*; Mars rover by Michael Carroll, *2:15*

Asteroids (minor planets): albedo, *6:84*; comet turned asteroid, *2:12*; computing diameters, *6:83*; contact binary, *3:8*; database of on floppy disk, *4:85*; 951 Gaspra, *4:21*; 243 Ida, *4:21*; 3 Juno, *2:78*; 114 Kassandra, *5:76*; meaning of spectral color, *1:15*; 1992 AD, *1:15*; 1992 QB_1, *1:26; 4:14*; 1993 FW, *6:9*; occultations of stars, *2:76*; 88 Thisbe, *3:81*; 4179 Toutatis, *1:76; 3:8*; Tunguska explosion, *3:15*

Astronomical constants: gravitational constant, *4:28*; Hubble parameter, *2:32*

Astronomy and society: Pope forgives Galileo, *1:8; 3:4, 32*; significance of COBE results, *1:4*

Atlases and catalogs: celestial map projections, *2:63*; deep-sky object designations and nomenclature, *4:38*

Atmospheric phenomena: haze, *5:69*; Novaya Zemlya solar mirage, *2:96*; ozone hole, *3:13; 6:6*; solar aureole, *5:69*; Sun pillars, *1:69*; volcanic twilights, *3:73*

Auroras: guidebook for observing, *2:52*

Bioastronomy: keeping Mars biologically pure, *2:15*; search for extraterrestrial intelligence, *3:6*, 22

Black holes: see ***Collapsed objects***

Chemistry: universal lithium, *3:11*

Collapsed objects: black hole at center of NGC 4261, *2:8*; at center of SN 1987A, *2:40*; closest pulsar, *5:14*; disks and jets associated with, *3:40*; fast-moving pulsar producing wake in gas, *5:8*; Geminga, *5:14*; a neutron star's first moments, *3:11*; possible black hole for X-ray Nova Muscae 1991, *5:13*

Comets: Austin, *1:116*; breakup observed, *6:8*; comet turned asteroid, *2:12*; Encke, *1:117*; Kuiper-belt objects, *1:26; 6:9*; 1992 QB_1, *1:26; 4:14*; Schaumasse, *1:116; 3:80*; Shoemaker-Levy (1993e), *6:8*; Swift-Tuttle, *1:16, 116; 2:9, 108; 3:9*; Wilson-Harrington, *2:12*

Computing: asteroid database, *4:85*; calculating instability of planetary orbits, *2:13*; determining limiting magnitude of CCD, *2:84*; determining star's visibility for lunar occultation, *1:89*; space-science data on compact-disc read-only memory (CD-ROM), *3:94; 4:84*

Constellation study: Bayer's lettering system, *2:6*; Ophiuchus, *6:63*; origin of zodiac, *4:63*; Serpens, *6:63*; Virgo diamond asterism, *5:110*

Cosmic background radiation: as pure blackbody, *4:9*; variations in, *3:15*

Cosmic rays: galactic source of, *6:10*

Cosmology: evolution of galaxies, *4:22*; expansion of universe, *2:31*; significance of COBE results, *1:4*; types of redshift, *2:31*

Dark matter: in dwarf galaxies, *3:7*; in galaxy clusters, *3:8*; implied from gravitational lensing, *2:14*

Eclipses:
Lunar: December 9, 1992, total, *2:8; 4:107*; June 4, 1993, total, *6:70*; fictional account in *King Solomon's Mines*, *4:7*
Solar: January 3, 1992, annular, *2:112*; May 21, 1993, partial, *5:70*; new circular series, *1:6*; viewing tips, *5:70*

Education: astronomers wanted for teaching youth, *4:6*; astronomy books for children, *1:80*; Astronomy To Go, *5:101*; and Soviet Astronomical Society, *1:7*

Galaxies: counterrotating material in, *5:11*; evolution of, *4:22*; most distant, *6:12*; optical thickness of, *3:12*; overlapping, *3:12*
Active: Arp 220, *2:6*; Hubble telescope confirms core structure, *2:8*; jet features, *3:40*; Markarian 421, *5:75*; NGC 4261, *2:8*; young radio galaxy, *1:14*
Clusters of: Abell 851, *4:23*; dark matter within, *3:8*; Virgo, *5:63*
Interacting: new systems born in collisions, *4:11*; NGC4038–39 (Antennae), *4:11*
Local Group (see also *Milky Way* and ***Magellanic Clouds***)**:** dark matter in dwarf systems, *3:7*; X-ray view of M31, *2:13*
Milky Way: galactic coordinates, *5:63*; high-velocity clouds, *1:15*; map of in infrared, *6:10*; source of cosmic rays, *6:10*
"Normal": M51, *6:106*; M63, *6:106*; M64, *5:11*; M81, *6:8*; M94, *6:106*; M101, *6:102*; M108, *6:44*; M109, *6:46*; NGC 2283, *2:110*; NGC 3738, *6:45*; NGC 3756, *6:45*; NGC 3898, *6:45*; NGC 3953, *6:46*; NGC 3982, *6:45*; NGC 3990, *6:45*; NGC 3998, *6:45*; NGC 4395, *4:110*; NGC 4565, *5:63*; NGC 4583, *4:111*; NGC 4627, *4:110*; NGC 4631, *4:110*; NGC 4656, *4:110*; supernova in M81, *6:8*

Gamma-ray astronomy: powerful source in Perseus, *3:14*; solar-flare afterglow, *2:11*

Gravitation: gravitational lensing, *2:14*; measuring the gravitational constant, *4:28*

HII regions: in M101, *6:105*

Herbig-Haro objects: HH 34, *3:41*

History: Comet Swift-Tuttle, *1:16*; Galileo versus the Vatican, *1:8; 3:4, 32*; George Hale's private observatory in Pasadena, *3:23*; measuring the gravitational constant, *4:28*; Mount Wilson Observatory, *3:18, 25*; Simon Newcomb as model for Prof. Moriarty, *6:11*; origin of zodiac, *4:63*; George Ritchey's mirror making, *1:98*

Hubble Space Telescope: amateur projects for, *1:12; 2:14*; confirms core structure of active galaxy, *2:8*; determining mass of Pluto-Charon, *1:9*; images of Io, *1:9*; loses third gyroscope, *4:11*; most distant galaxy, *6:12*; protoplanetary disks in Orion nebula, *3:9*; shuttle mission to repair, *4:8*; survey of galaxies, *4:22*

Imaging:
Astrophotography: adaptive-optics system, *4:52*; cold camera, *3:62*; off-axis guiders, *2:45*; selecting guide star, *2:105*
Charge-coupled devices (CCDs): determining age of open star cluster, *5:105*; determining limiting magnitude, *2:84*; photometry, *5:83, 105*; using in urban settings, *1:110*; with wide-field cameras and small telescopes, *6:19*; work of Jack Newton, *4:101*
Image processing: color CCD imaging, *5:34*

Infrared astronomy: map of Milky Way, *6:10*; sunspots, *5:13*

Interferometry: Joint Institute for VLBI in Europe, *5:12*; optical on Mount Wilson, *3:21*

Intergalactic matter: dark matter, *3:8*; neutron stars ejected from galaxies, *5:8*

Interplanetary matter: from interstellar space, *4:15*

Interstellar matter: detected in solar system, *4:15*; high-velocity clouds, *1:15*; polycyclic aromatic hydrocarbons, *3:13*; shock compression of, *5:10*

Laboratory astrophysics: determining gravitational constant, *4:28*

Light pollution: *2:69, 98*; complaining to lighting manufacturers, *6:6*; Earth-orbiting mirrors, *6:69*; legislation becoming widespread, *4:69*

Magellanic Clouds: honeycomb nebula, *4:13*

Meteorites: fall in Peekskill, New York, *1:9; 2:26*; fall in Uganda, *6:96*; possibly striking truck, *5:6*

Meteors: asteroidal stream observing results, *1:7*; Kappa Cygnid shower, *6:105*; fireball on Schmidt camera plate, *6:22*; Geminid shower, *6:105*; importance of observing, *2:6*; Lyrid shower, *4:78*; "mini-shower," *5:109*; new shower in Cetus? *3:119*; Orionid shower, *6:105*; Perseid shower, *2:108*; Quadrantid shower, *1:78; 6:105*

Molecular clouds: extent in Milky Way, *1:6*; formation of stars, *5:18*

Molecules: fullerenes, *3:13*; polycyclic aromatic hydrocarbons, *3:13*; trihydrogen on Uranus, *4:15*

Moon: brightness of, *4:14*; "city" on, *5:109*; Galileo flyby, *4:18*; "opposition effect," *4:14*; sodium coma, *6:19*; telescopes for use on, *1:13*; Triesnecker Rilles, *3:74*

Nebulae:
Bright: Barnard's Loop, *1:114; 6:19*; bipolar (crablike), *4:12*; California, *1:114*; Guitar, *5:8*; honeycomb, *4:13*; IC 5067 (Pelican), *4:39*; imaged with wide-angle CCD, *6:19*; M1 (Crab), *4:38*; M17 (Omega), *5:76*; M42 (Orion), *1:48; 2:70, 110; 3:9*; M43, *1:48*; Rosette, *1:114; 3:38*; seeing with naked eye, *1:114*; Veil (Cygnus Loop), *5:10*
Dark: Barnard 68, *5:18*; and star formation, *5:18*
Planetary: M97 (Owl), *6:45*; NGC 2371–2372, *3:47*; NGC 2392 (Eskimo), *3:48*; NGC 7027, *6:11*

Neutrino astronomy: solar neutrino-production theory, *1:6*

Neutron stars: see ***Collapsed objects***

Novae: Muscae 1991, *5:13*; T Pyxidis, *3:76*

Observatories (amateur and public): Loren Bird's "Starthenon," *1:95*; Grasslands, *5:98*; Jack Newton's dream home, *4:99*; David Oesper's roll-down-roof, *5:90*

Observatories (professional): Calar Alto, *6*:30; Cerro Tololo Inter-American, *2*:21; Effelsberg, *6*:29; European Southern, *2*:19; Gornergrat, *6*:28; Hat Creek, *4*:8; La Palma, *6*:31; Mount Wilson, *3*:18, 25; Pic du Midi, *1*:20; *5*:8; *6*:26; Pico del Teide, *6*:32; Pico Veleta, *6*:29; Sonneberg, *5*:8; SR-71 Blackbird, *6*:16; Sudbury Neutrino, *1*:6

Observing techniques: determining star's visibility for lunar occultation, *1*:89; for double stars, *3*:112; planetary observing with large telescopes and excellent seeing, *1*:20

Occultations: April 19, 1993, of Venus by Moon, *4*:75; determining star's visibility for lunar occultation, *1*:89; stellar by asteroids, *2*:76

Optics: adaptive, *3*:22; *4*:52; riflescopes for finders, *6*:93; Space Shuttle's windows, *6*:53; using liquid mercury, *4*:12

Organizations: American Association of Variable Star Observers, *4*:102; *5*:4; Astronomical League, *5*:5; Astronomical Society of the Pacific, *5*:4; Central Bureau for Astronomical Telegrams, *6*:98; International Dark-Sky Association, *2*:69, 98; Mount Wilson Institute, *3*:21; Royal Astronomical Society of Canada, *5*:4

People: Ford, C. B., *4*:102; Galilei, G., *1*:8; *3*:4, 32; Hartsel, D., *3*:105; Hunter, T., *2*:98; Kiuchi, T., *1*:17; Lovi, G., *5*:9; Marsden, B., *6*:98; Newcomb, S., *6*:11; Newton, J., *4*:99; Oort, J. H., *1*:8; *4*:44; Ritchey, G. W., *1*:98; Summerfield, B., *5*:101

Planets and their satellites:

Earth (see also ***Moon***): Galileo flyby, *1*:8; *4*:18; ozone hole, *3*:13; Tunguska explosion, *3*:15; Yucatán impact feature, *1*:12

Jupiter: Himalia, *2*:112; importance to development of life on Earth, *5*:8; sharp images of Io from Hubble telescope, *1*:9; sodium cloud, *6*:20; South Equatorial Belt fades, *4*:76

Mars: dust storms, *1*:104; keeping biologically pure, *2*:15; marsquakes, *5*:12; spacecraft imagery on CD-ROM, *3*:94; visualizing canals, *2*:100; water content of, *4*:15

Neptune: early visual sightings of Great Dark Spot, *4*:6

Pluto: mass of system, *1*:9

Saturn: eclipses of Iapetus, *5*:79; observing material in Cassini division, *5*:7

Uranus: trihydrogen on, *4*:15

Venus: April 19, 1993, occultation by Moon, *4*:75; Magellan radar imagery, *1*:11; water on, *6*:9

Pulsars: see ***Collapsed objects***

Quasars: amateur sightings of Twin Quasar, *3*:119; jet features, *3*:40

Radar astronomy: revealing 4179 Toutatis as contact binary, *3*:8

Science policy: Gemini Project funding, *5*:26; Soviet Astronomical Society, *1*:7

Solar system: importance of giant planets to development of life on Earth, *5*:8; Kuiper belt, *1*:26; *6*:9; planet orbital instability, *2*:13

Spacecraft (see also ***Hubble Space Telescope***): Advanced Satellite for Cosmology and Astrophysics, *5*:8; Cassini, *5*:14; Compton Gamma Ray Observatory, *2*:11; *3*:14; *6*:14; Cosmic Background Explorer, *1*:4; *6*:10; Extreme Ultraviolet Explorer, *5*:10; Galileo, *1*:8; *3*:8; *4*:18; keeping Mars landers biologically pure, *2*:15; Magellan, *1*:11; *6*:14; Mars Observer, *6*:14; Mir, *6*:13; Noviy Svet space mirrors, *6*:13; Pioneer Venus, *2*:12; *6*:9; potential damage by close comet, *4*:6; Rosat, *2*:13; *3*:8; Space Infrared Telescope Facility, *6*:14; Ulysses, *4*:15; Voyager, *5*:9

Space policy: NASA reorganization, *2*:9

Star clusters:

Globular: M3, *5*:64, 108

Open: Collinder 70, *1*:49; Collinder 285, *6*:43; determining age of, *5*:105; M37, *5*:105; M41, *2*:64, 110; M44 (Beehive), *3*:68; *5*:66; M45 (Pleiades), *1*:64, 67; NGC 1981, *1*:49; NGC 2244, *3*:38; NGC 6910, *6*:104

Stars: Be transformation, *1*:14; disks and jets associated with, *3*:40; energy transport from corona to photosphere, *2*:11; formation of, *4*:9; *5*:18; nearest to Sun, *4*:70; sighted down a well during daytime, *3*:119

Double and multiple: Castor, *3*:47; Alpha Centauri, *4*:70; Delta Geminorum, *3*:49; Kappa Geminorum, *3*:48; Mizar and Alcor, *6*:64; observing tips, *3*:112; 42 and 45 Orionis, *1*:49; Delta Orionis, *1*:49; Iota Orionis, *1*:48; Sigma Orionis, *1*:49; Theta^1 (Trapezium) and Theta^2 Orionis, *1*:48; Struve 747, *1*:48; Struve 1124, *3*:48; Struve 1603, *6*:46

Individual: Arcturus, *6*:66; Barnard's star, *4*:70; Merak, *6*:43; 31 Orionis, *1*:49; Pollux, *3*:47; Proxima Centauri, *4*:9, 70; Wolf 359, *4*:72

Variable: eclipsing binary in Trapezium, *2*:72; 49 Eridani, *2*:9; Eta Geminorum, *3*:71; Mu Geminorum, *3*:71; Zeta Geminorum, *3*:70; Beta Lyrae, *6*:72; HD17520, *1*:14; in Orion nebula, *2*:70; performing CCD photometry on, *5*:83; Z Ursae Majoris, *6*:46

Sun: energy transport from corona to photosphere, *2*:11; flare gamma-ray afterglow, *2*:11; neutrino-production theory, *1*:6; Novaya Zemlya solar mirage, *2*:96; sunspots in infrared, *5*:13

Sundials: information wanted on, *4*:6

Supernovae: most distant observed, *1*:8; SN 1987A, *2*:39; SN 1993J in M81, *6*:8; Veil remnant, *5*:10

Telescope making: binocular mount, *4*:90; off-axis Newtonian, *3*:87; *4*:93; riflescopes for finders, *6*:93; ruby masking tape to make red flashlight, *6*:93; solar finder, *2*:93; solar telescope using polarizing mirrors, *6*:89; styrene plastic gears, *6*:93; 20-inch binocular telescope, *2*:89

Telescopes (amateur): benefits of small refractor, *4*:4; Engelhorn's 6-inch off-axis Newtonian, *3*:87; *4*:93; George's 15-inch refractor, *3*:103; Hérard's 4-inch polarizing solar telescope, *6*:89; Livitski's 20-inch binoculars, *2*:89

Telescopes (professional): Anglo-Australian (3.9-meter), *2*:23; Australia Telescope at Narrabri, *2*:24; Gemini Project (8.1-meter), *2*:8; *5*:26; Hat Creek radio antenna destroyed, *4*:8; William Herschel (4.2-meter), *6*:31; Hooker (100-inch), *3*:18; on the Moon, *1*:13; Nordic Optical (2.5-meter), *6*:31; UBC-Laval liquid mercury (2.7-meter), *4*:12

Timekeeping: time corrections, *1*:60

Ultraviolet astronomy: extragalactic objects imaged in extreme ultraviolet, *5*:10; from high-altitude aircraft, *6*:16; Voyager spectrometers funding stopped, *5*:9

Very large-scale structure: overall motions of galaxies, *5*:15

Vision: canals on Mars, *2*:100; naked-eye deep-sky objects, *1*:114; Sirius in the daytime, *2*:112; star sighted down a well during daytime, *3*:119

X-ray astronomy: Japanese satellite, *5*:8; Nova Muscae 1991, *5*:13; X-ray image of M31, *2*:13

Index to Volume 86

July–December 1993

Titles

Extragalactic Distance Scale, The: Agreement at Last? *Paul Hodge, 4:16*
George Lovi: Scholar of the Skies, *Sam Storch* and *Joe Rao, 2:59*
Hails from the Heliopause, *J. Kelly Beatty, 4:30*
How We'll Fix the Hubble Space Telescope: An Astronaut's Anticipations, *Jeffrey A. Hoffman, 5:23*
Hubble's Road to Recovery, *Richard Tresch Fienberg, 5:16*
IUE: 15 Years and Counting, *Yoji Kondo, Willem Wamsteker,* and *David Stickland, 3:30*
Modeling the Universe in Your Mind, *Hugh Downs, 4:24*
New Face of Venus, The, *Ellen R. Stofan, 2:22*
November 3, 1994: Waiting for Totality, *Joel K. Harris, 5:33*
Pearls on a String, *David H. Levy, 1:38*
Port Orford Meteorite Hoax, The, *Howard Plotkin, 3:35*
Portrait of Our Galaxy, A, *Jon Lomberg, 6:38*
Rediscovering the Color of the Crab Nebula, *David Malin* and *Jay M. Pasachoff, 1:43*
Robert Haag: Rock Star, *J. Kelly Beatty, 1:18*
S&T's Guide to the World's Largest Telescopes, *Roger W. Sinnott* and *Kari Nyren, 1:27*
S&T Test Report: Choosing a Low-Cost Telescope, *Terence Dickinson, 6:59*
S&T Test Report: Electrim's Neat Little CCD Imagers, *Roger W. Sinnott, 3:44*
S&T Test Report: Home-Dome from Technical Innovations, The, *Paul R. Castle* and *Jim Phillips, 1:51*
S&T Test Report: Meade 127ED Apo Refractor, The, *George East, 5:43*
S&T Test Report: Return of the Celestron C5, The, *Dennis diCicco, 4:39*
Storm Watch for the Perseids, *Joe Rao, 2:43*
Supernova with an Identity Crisis, A, *Alexei V. Filippenko, 6:30*
Temples in the Sky Part III — The New World, *Serge Brunier, 6:18*
Venus in 3-D, *Jeffrey J. Plaut, 2:32*
Working Magellan's Magic, *J. Kelly Beatty, 2:16*
Yohkoh and the Mysterious Solar Flares, *Carolyn Collins Petersen, Marilyn Bruner, Loren Acton,* and *Yoshiaki Ogawara, 3:20*

Authors

Acton, Loren, see *Petersen, Carolyn Collins*
A. M. see *MacRobert, Alan M.*
Anderson, Jay, Seeking Clear Eclipse Skies, *5:37*
Bath, Karl-Ludwig, letter, *1:6*
Beatty, J. Kelly, Catch a Falling Star, *1:23*
Hails from the Heliopause, *4:30*
Questions of Ownership, *1:24*
Robert Haag: Rock Star, *1:18*
Tale of Two Cities, A, *6:98*
Working Magellan's Magic, *2:16*
Becker, Peter W., letter, *2:7*
Bond, Gordon, letter, *1:6*
Bormanis, Andre, Alan French, Michael Rudenko, Steven Morris, Karl-Hermann Klein, Andrew J. Elliott, and *Michael W. Masters,* Ticked Off About Telescopes, *5:4*
Bortle, John E., Comet Mueller at the Little Dipper, *4:71*
Comet Swift-Tuttle: Worth the Wait, *1:107*
Unusual Apparition of Comet Encke, An, *6:105*

Departments and Features

Amateur Astronomers —
Beautiful But Persistent Bishop's Ring, The, *2:90*
Big Blue in Hawaii, *2:93*
Calendar of Events, *1:102, 2:94, 4:95, 5:97*
Investing in Dark Skies, *4:91*
M51: The Movie, *3:95*
Reflections on the 1993 Winter Star Party, *3:88*
Riverside's Silver Anniversary, *5:94*
Star-Party Etiquette, *3:90*
Star Trails, *1:101, 2:91, 3:91, 4:94, 5:96, 6:100*
Tale of Two Cities, A, *6:98*
World's Largest Solar-System Model, *1:99*
Astronomical Computing —
Anatomy of a Lunar Eclipse, *3:76*
Boston Tea Party, The, *6:83*
How Long Is a Lunar Month? *5:76*
My Robotic Astroscan, *2:76*
Night the *Titanic* Went Down, The, *4:79*
Suntans and the Ozone Layer, *1:83*
Backyard Astronomy —
Observer's Guide to Saturn, An, *5:52*
Projects for Moonlight Nights, *3:51*
Star-Hop from Andromeda, A, *6:45*
Star-Hop in the Cepheus Milky Way, A, *4:48*
When, Where, How To Watch, *2:49*
Books & Beyond —
Annie and the Stars of Many Colors, Barbara Welther and Alex Griswold, *5:54*
Binary Maker 2.0, Contact Software, *3:57*
Binocular Astronomy, Craig Crossen and Wil Tirion, *4:53*
Briefly Noted, *1:61, 2:56, 3:57, 4:57, 6:54*
CalMaster 2000, Albert O. and Piyavadee P. Scheffler, *5:56*
Canon of Lunar Eclipses: 1500 B.C. – A.D. 3000, Bao-Lin Liu and Alan D. Fiala, *2:55*
Celestial Delights, Francis Reddy and Greg Walz-Chojnacki, *5:55*
Ceres, Zephyr Services, *1:59*
Deep Sky Field Guide, The, Murray Cragin, James Lucyk, and Barry Rappaport, *2:53*
Light and Color in the Outdoors, Marcel Minnaert, *6:52*
MICA, U. S. Naval Observatory, *2:54*
New Astronomy, Johannes Kepler, *6:53*
Pauper and Prince: Ritchey, Hale, and Big American Telescopes, Donald E. Osterbrock, *3:54*
Sky Watcher's Handbook, James Muirden, *4:54*
Software Update, *1:61, 3:56*
So Many Galaxies . . . So Little Time, Boyd Estus and Margaret Geller, *5:54*
Space Age, William J. Walter, *1:57*
Spaceship Neutrino, Christine Sutton, *1:60*
To a Rocky Moon: A Geologist's History of Lunar Exploration, Don E. Wilhelms, *3:55*
TotalEclipse, Michael R. Smith, *4:56*
Celestial Calendar —
AE Aquarii: A High-Energy Variable, *3:68*
Asteroid Occultation in M8, An, *1:77*
Calendar Notes, *1:77, 2:73, 3:71, 4:72, 5:71, 6:78*
Comet Mueller at the Little Dipper, *4:71*
Exploring the Moon's South Pole, *4:66*
Far Eastern Transit of Mercury, *5:69*
Finding Sidereal Time, *4:72*
Find Vesta near Saturn and the Helix, *3:66*
Geminid Meteor Shower, The, *6:76*
Jovian Belt Reborn, *1:78*
Jupiter Satellite Events, *1:76, 2:71*
Jupiter's Satellites, *1:76, 2:71, 3:69, 5:69, 6:78*
Leonid Meteor Watch, *5:69*
Moons of Uranus and Neptune, The, *2:72*
November's Eclipse of the Moon, *5:66*
Rare Eclipse of Iapetus, A, *1:72*
Rendezvous with Mir, *2:67*
RX and U Cephei, *4:68*
Saturn's Satellites, *3:70, 4:68, 5:70, 6:78*
Six Asteroid Occultations, *6:77*
Two Satellites to Spot, *6:74*
Watching the Rise of R Draconis, *1:70*
Evening Sky, The, for . . . (current month), *1:64, 2:60, 3:60, 4:60, 5:60, 6:68*
50 & 25 Years Ago, *1:7, 2:7, 3:7, 4:7, 5:7, 6:7*
Focal Point —
Dark Side of Dark Skies, The, *3:4*
Heavenly Indulgence, *4:4*
Needed: A Better Name for the Big Bang, *2:4*
Planetariums and the Bottom Line, *1:4*
Ticked Off About Telescopes, *5:4*
2001 at Twenty-Five, *6:4*
Images, *1:36, 4:34*
Letters, *1:6, 2:6, 3:6, 4:6, 5:6, 6:6*
New Product Showcase, *1:48, 3:40, 4:44, 5:41, 6:49*

Selected Topics and Celestial Objects

This listing is not intended to be exhaustive and does not supplant the other parts of the index. For example, material in such regular features as Books & Beyond is ordinarily indexed only under the Departments and Features section.

Amateur activities: amateur radio, *3:70*; *ATM Journal*, *5:89*; auction of rare equipment and books, *5:90*; cost of conventions, *1:7*; crater timings during lunar eclipses, *5:67*; discovery of SN 1993J, *6:31*; Earth-orbiting satellite observing, *2:101*; *6:74*; educating children about light pollution, *4:91*; for moonlit nights, *3:51*; national amateur organizations, *2:6*; observing Mir, *2:67*; Perseid meteor shower, *2:49*; in prison, *1:101*; Riverside Telescope Makers Conference, *5:94*; safety concerns for dark sites, *3:4*; star-party etiquette, *3:90*; supernova hunting, *3:91*; *6:31*; Ulysses Comet Watch, *1:6*; Winter Star Party, *3:88*
Archaeoastronomy: Aztec calendrical system, *5:58*
Art: Michael Carroll's Mars Observer, *5:8*; 1854 fireball engraving, *2:47*; 8-meter telescope at Grand Canyon, *3:54*; Jon Lomberg's *A Portrait of the Galaxy*, *6:38*; M51 movie, *3:95*; Pat Rawlings's humans exploring Mars, *1:57*; Bert Vandermey's binary black hole, *5:13*; John R. Whitman's *First Rockets Fired* of *Titanic* sinking, *4:79*
Asteroids (minor planets): 407 Arachne, *5:71*; 419 Aurelia, *6:77*; 3628 Božněmcová, *5:11*; 1 Ceres, *2:101*; close flyby of Earth, *3:9*; 78 Diana, *6:77*; 27 Euterpe, *4:72*; *6:77*; 19 Fortuna, *2:73*; *5:71*; 951 Gaspra, *1:11*; 243 Ida, *3:15*; *6:9*; 89 Julia, *3:71*; linked to meteorite, *5:11*; 1993 KA, *3:9*; 2 Pallas, *2:101*; *3:71*; 203 Pompeja, *6:77*; resolving disks of, *2:101*; 24 Themis, *1:77*; 30 Urania, *6:77*; 4 Vesta, *3:66*; *5:11*; 144 Vibilia, *6:77*
Astronomical constants: deceleration parameter, *3:12*; Hubble parameter, *4:16*
Astronomy and society: the Big Bang, *2:4*
Atlases and catalogs: user-specific catalogs for digital guiding systems, *5:4*
Atmospheric phenomena: Bishop's ring, *2:90*; fogbows, *3:65*; *5:65*; noctilucent clouds, *1:69*; *4:105*
Auroras: building magnetometer to detect, *4:85*
Balloon astronomy: "ripples" in cosmic background radiation, *1:10*
Black holes: see ***Collapsed objects***
Calendars: Aztec, *5:58*; beginning of Chinese, *6:13*; lunar-based, *3:59*
Collapsed objects: in A0620 –00, *4:10*; binary black hole at quasar's center? *5:13*; Geminga pulsar, *2:13*; object at galactic center, *2:10*; pulsars in Terzan 5, *1:14*; Q stars, *4:10*
Comets: Halley, *3:32*; Mueller (1993a), *4:71*; Shoemaker-Levy (1993e), *1:38*; *2:8*; Swift-Tuttle, *1:107*; *2:43*; Ulysses Comet Watch, *1:6*
Computing: automating an Astroscan 2001, *2:76*; length of lunar month, *5:76*; modeling the Earth's shadow during a lunar eclipse, *3:76*; software for designing unobstructed reflectors, *5:88*; ultraviolet transmission of atmosphere, *1:83*
Conjunctions: marking beginning of Chinese calendar, *6:13*
Constellation study: mythology of bird-related constellations, *4:58*
Cosmic background radiation: "ripples" confirmed, *1:10*
Cosmology: deceleration parameter, *3:12*; Edward Harrison's alternate models of expansion, *3:11*; open or closed universe? *3:12*; renaming the Big Bang, *2:4*; simplified model of cosmic time and distance, *4:24*; size of universe, *4:16*
Dark matter: dust in NGC 4753, *2:11*; halos around galaxies, *3:10*; Massive Compact Halo Objects (MACHOs), *6:9*; sparse dark matter in M105, *6:11*
Detectors: magnetometer for auroras, *4:85*
Eclipses:
Lunar: December 9–10, 1992, total, *1:113*; June 4, 1993, total, *4:106*; *5:102*; November 28, 1993, total, *5:66*; modeling the Earth's shadow, *3:76*
Solar: November 3, 1994, total, *5:33*, *37*
Education: Baltimore Charter and sexual discrimination in astronomy, *4:13*; city-size scale solar-system model, *1:99*; light pollution, *4:91*; staffing concerns at planetariums, *1:4*; *5:6*
Galaxies: dark-matter halos, *3:10*; determining distances to, *4:16*; measuring magnetic fields of, *4:11*; supershells, *4:12*; theory for spiral structure, *6:10*
Active: active galactic nuclei, *3:12*; Cygnus A, *1:13*; BL Lacertae object in Boötes, *1:12*
Clusters of: gravitational lensing, *1:15*; *5:12*; structure of Coma, *1:10*
Interacting: M51, *6:10*; Markarian 463, *2:12*; mergers become ellipticals, *6:14*; Milky Way and Large Magellanic Cloud, *2:8*; misidentified merging pair, *3:10*; NGC 7252, *2:8*; polar-ring galaxies, *3:10*
Local Group (see also *Milky Way* and ***Magellanic Clouds***): dynamical history of local systems, *5:11*; IC 342, *5:12*; M31, *4:9*, *10*1; *5:100*; *6:45*; M32, *4:102*; *5:101*; *6:45*; M33, *4:103*; *6:46*; Maffei 1, *5:12*; NGC 205 (M110), *5:101*; *6:45*
Milky Way: filament near galactic center, *3:11*; map of in gamma rays, *4:9*; object at galactic center, *2:10*; painting of, *6:38*; Sagittarius A*, *2:10*; tearing apart Large Magellanic Cloud, *2:8*
"Normal": IC 4617, *1:110*; M74, *5:103*; M77, *4:103*; M82, *4:11*; M105, *6:11*; M110, *4:102*; NGC 55, *4:102*; NGC 147, *4:102*; NGC 185, *4:102*; NGC 253, *4:102*; NGC 404, *4:103*; *6:45*; NGC 891, *6:47*; NGC 1023, *6:47*; NGC 1316, *4:102*; NGC 1317, *4:103*; NGC 1365, *4:102*; NGC 4258, *4:11*; NGC 4631, *4:12*; NGC 4753, *2:11*; NGC 6207, *1:110*; NGC 6928, *2:101*; NGC 7331, *4:101*
Gamma-ray astronomy: all-sky map, *4:9*; effects from orbiting nuclear reactors, *1:14*; *3:8*; gamma-ray bursts, *1:9*
Gravitation: brightening quasars, *5:12*; gravitational lensing, *1:15*; *5:12*; gravitational-wave experiment using interplanetary spacecraft, *1:16*; lensing as distance indicator, *4:20*; microlensing, *6:9*
Herbig-Haro objects: in Orion nebula, *2:10*
History: Perseid meteor shower of 1863, *2:47*; Port Orford meteorite hoax, *3:35*; Ritchey's grinding and polishing machine, *1:95*; *Titanic* sinking, *4:79*; U. S. Naval Observatory, *4:94*
Hubble Space Telescope: double nucleus of M31, *4:9*; Markarian 463, *2:12*; new distance to Proxima Centauri, *4:13*; NGC 7252 as result of galaxy merger, *2:8*; optical counterpart to X-ray source in NGC 6624, *5:9*; repairing, *2:9*; *4:14*; *5:16*, *23*
Imaging:
Astrophotography: lunar eclipses, *5:67*; Perseid meteor shower, *2:97*; true color of Crab nebula, *1:43*
Charge-coupled devices (CCDs): chip arrays, *6:13*; focusing hints, *4:88*; imaging Jupiter, *3:102*
Image processing: determining Earth's shadow, *3:76*; M51 movie, *3:95*
Infrared astronomy: counterpart to GX340+0, *2:12*; inner spiral structure of M51, *6:10*; inner structure of Egg nebula, *3:13*
Interstellar matter: nebulosity around Pleiades, *1:12*
Light pollution: educating children about light pollution, *4:91*; International Dark-Sky Association, *4:65*; legislation proposed, *2:65*; New Jersey study commission formed, *2:13*
Magellanic Clouds: Large Cloud disrupted by Milky Way, *2:8*
Masers: fast-moving in NGC 4258, *4:11*
Meteorites: collecting, *1:18*; flash-melted material in, *4:14*; Robert Haag, *1:18*; linked to asteroid, *5:11*; ownership of, *1:24*; penetrating Japanese house, *2:13*; Port Orford hoax, *3:35*; striking truck? *2:7*
Meteors: Delta Aquarid shower, *1:77*; Geminid shower, *6:76*; how to observe, *2:49*; Leonid shower, *5:69*; Orionid shower, *4:72*; Perseid shower, *2:43*, *47*; *4:8*; photographing, *2:97*; Ursid shower, *6:76*
Moon: apparent sizes at perigee and apogee, *1:113*; Blue Moons, *3:59*; and calendars, *3:59*; December 12, 1993, occultation of Venus, *6:78*; length of lunar month, *5:76*; mosaic taken by Mariner 10, *4:34*; south pole region, *4:66*
Nebulae:
Bright: Crab, *1:43*; Egg, *3:13*; NGC 206, *6:46*; NGC604, *4:103*; Sharpless 2–132, *4:49*

FOCUS ON

McNeese State University Farm

Lake Charles, Louisiana

Illustrated is an 18½-foot-diameter Ash Dome Observatory built to house a 12½-inch telescope. The observatory is intended to serve as a general-purpose facility, meeting the needs of the faculty, students, area high school students, and astronomy groups.

The observatory is located at the McNeese State University Farm and is supervised by the Department of Physics. This type of dome was chosen since the area is frequented by high winds and hurricanes.

Ash Domes have been recognized internationally by major astronomical research groups, universities, colleges, secondary and primary schools for their performance, durability, and dependability. Mechanical or electrical dome and shutter drives in sizes from eight to 30 feet in diameter; sensibly priced.

Brochures and specifications available.

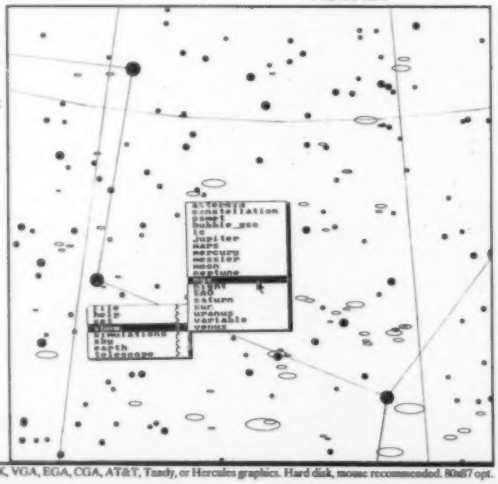
SUPERSTAR

picoSCIENCE
41512 Chadbourne Drive
Fremont, CA 94539
510/498-1095

New Release!

Now the premier PC-based Astronomy program is more powerful!

- Some operations 5-10X faster
- More catalogs supported, including:
  - SAO Catalog
  - Hubble Guide Star Catalog
  - 3rd Edition GCVS
  - 4th Edition GCVS
  - RNGC
  - NGC2000.0
  - Uppsala Catalog of Galaxies
  - QSO Catalog
  - Asteroid Catalog
  - Comet Catalog
  - Many more
- Dozens of new commands
- Smoother planetary animation
- Super VGA support



SUPERSTAR	**$149.95**
SUPERSTAR/professional	**$249.95**
DEMO	**$5**

Requires IBM PC or compatible, DOS 2+, 640K, VGA, EGA, CGA, AT&T, Tandy, or Hercules graphics. Hard disk, mouse recommended. 80x87 opt.
